Are You Easy to Hack?

Use a team of experts to test your network defenses.

MITIGATE BUSINESS RISK WITH PENETRATION TESTING

What if you could find out before you're compromised? That's the idea behind penetration testing. Our ethical hackers find and exploit your weaknesses, then deliver a plan to improve your security before the unthinkable happens.

Too many organizations fall prey to hackers:

The average cost of a data breach is $4.45M (IBM). Why not find your vulnerabilities before hackers exploit them?

Leverage the power of penetrating testing:

Penetration testing puts your systems through a rigorous evaluation. Our team of ethical hackers tries every trick in the book to get into your network.

- Supplement compliance audits with real-world outcomes
- Get documented evidence of security weaknesses
- Get peace of mind with a clear plan for remediation

What you get:

You get a detailed assessment of vulnerabilities on your publicly accessible systems--plus a plan to mitigate them. You can implement the plan yourself or engage a trusted partner like Corsica Technologies.

- Intelligence gathering
- Network & application reconnaissance
- Vulnerability discovery & analysis
- Ethical hacking exercises
- Executive summary & formal presentation
- Technical report & targeted action plan

Corsica's penetration testing service includes external network-based penetration testing only, and does not include web app testing, phish testing, or social engineering.
